HTML, CSS, Bootstrap, JavaScript, jQuery, React Java SE, Java EE (Servlets, JSP), Spring, Tomcat, Junit, Hibernate, Thymeleaf, MySQL, AWS, Maven, Micro-Services, Object-Oriented Programming, Test-Driven Development, Version Control with Git, Paired Programming

Education

Codeup

Certification of Completion
July 2022 - Jan 2023
A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development

USAF Security Forces Technical School

Jan 2019 - May 2020
An Department of Defense academy that teaches basic security functionality, including missile security, and capture and recovery of nuclear weapons

Enthusiastic Software Engineer with a passion for developing innovative and modernized Full-Stack Applications. Determined-minded, with eagerness to always explore new technologies or grasp a deeper understanding of existing ones. Collaborative, with the ability to embed in any team and become a pivotal difference maker due to devotion for Software Engineering.

Development Projects

[LockerRm](#)

The Locker Room is a sports-based Full-Stack Application, built with React JS and Spring Boot. The purpose of this application is to provide those die-hard fans with quick access to the information that matters without all the extra clutter and distractions. The application will host their favorite Team's Seasonal and Divisional Records, NFL news coverage, Player information with injury updates, and of course; a schedule listing all games that will play that week with Game Score and Quarter updates.

[Living Faith Bible Church](#)

Living Faith Bible Church is a religious organization that is establishing its footprint beyond the means of social media. The objective of this Full-Stack Application, constructed with Spring Boot, is to make their presence known by displaying critical information to their target audiences. Throughout the application users are introduced to LFBC in an interactive way by the means of Javascript, Thymeleaf, and CSS to display eye-catching views about the organization.

[WeatherMap Application](#)

WeatherMap is an application that gathers real-time weather data from all over the world, by the use of MapBox API and OpenWeather API. The app renders data in a 5-day forecast that is easy to read, control, and adjust. The app utilizes a combination of Javascript, JQuery, CSS, and Bootstraps for common web3.0 operations.

Military Experience

U.S. Air Force - Oklahoma City, OK

Security Forces / Nov 2018 - Nov 2022

- Analyze and evaluate security operations to identify risks or opportunities for improvement through auditing, review, or assessment.
- Assess risks to mitigate potential consequences of incidents and develop a plan to respond to incidents.
- Attend meetings, professional seminars, or conferences to keep abreast of changes in executive legislative directives or new technologies impacting security operations.
- Communicate security status, updates, and actual or potential problems, using established protocols.
